Membrane Technologies Workshop

from Kennedy/Jenks Consultants

Thursday, November 4, 2010 – Austin, TX

Located at Vintage Villas Hotel

8:00 a.m. to 4:30 p.m.

Continental breakfast and lunch provided

Continuing Education Credits available

Taught by faculty with world-class membrane expertise

Membranes have become a compelling solution for water/wastewater treatment, reuse, and desalination.

This workshop will help you:

- Discover the treatment value of membrane technologies for both ground and surface water.
- Learn about ballasted sand or “pellet softening” as an alternative to traditional lime softening.
- Address important issues related to membrane pilot testing and design.
- Compare treatment performance of different membrane technologies.
- Understand O&M considerations of membrane systems.
- Learn of potential funding opportunities for both demonstration and system enhancement projects.

Yes, I am interested in attending. Please send me more information.
